Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1,3,7 are rejected under 35 U.S.C. 102(e) as being anticipated by Hillis.

Hillis discloses a method of displaying an accounting state for a communication service by a terminal device, comprising steps of receiving a communication service (block 40 user enters number), to which a plurality of accounting methods (account method for fixed location vs. accounting method for conference call vs. accounting method for ISU to ISU) can be applied rates are variable and hence are accounting based results), from a network and providing the communication service for a subscriber; and displaying accounting quantities corresponding to each of said plurality of accounting methods in the process of utilizing the communication service (col. 6 lines 50 et seq. since the displayed rate result of an other

Art Unit: 3627

accounting practice is shown in the process of its use without deference to any other method, the claim meets this limitation). Re claim 3: the specified accounting quantity is read as the display of the rate disclosed in col. 6 lines 50-55. Re claim 7: Hillis disclose notifying the network of pieces of information when he discloses accepting the call at col. 6 , line 27.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hillis in view of Kikuchi et al.

Hillis discloses the invention substantially as claimed except that it fails to disclose the specifics of claims 2,4,5,6. However Kikuchi et al. disclose obtaining a piece of information on an accounting degree (see unit fee per unit time information 121) corresponding to each of said plurality of accounting methods from said network when the communication service starts being utilized; and measuring, in the

Art Unit: 3627

process of utilizing the communication service, an quantity of an accounting element corresponding to an accounting method, (speech fee process 208) calculating and displaying said accounting quantity (display 212 displays the fee from the calculation made by timer 206). RE claim 4 it is deemed a mere repetition of steps to calculate and display the fee for various other rates stored in the unit fee database and since these fees while at some point appear on the display 150, they are deemed to have been shown "together". Re claim 5 and 6, the use of an alarm to sound when a value is exceeded is deemed to be an old and notorious expedient in the art. Re claim 3: the specified accounting quantity is read as the display of the rate disclosed in Hillis col. 6 lines 50-55. Re claim 7: Hillis disclose notifying the network of pieces of information when he discloses accepting the call at col. 6 , line 27.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
